Teams

To qualify to compete as a team, the team must have at least 5 team members competing in the same event category. Teams may also compete in multiple event categories by meeting the minimum 5 team member requirement for any event category. If a team member is completing a combo pack, that team member counts as one qualifying team member in each event category completed.

To qualify for team results, the team must have at least 5 team members with valid results in the same event category. Teams may qualify for team results in multiple event categories by having at least 5 team members with valid results in any event category.

The team's top 5 team members in a qualifying event category are used to compute the team's overall placement in the event category.

If a team is created, but does not qualify to compete, the team and its team members will still be recognized and associated in the race results.

A team captain will be able to create a team as a part of registering for the event. After the team has been created, additional team members will be able to select and join the team as a part of registering for the event. Team captains will be notified by email anytime someone joins the team. An email is sent overnight to the team captain only on days where one or more team members have joined the team.
